Letter from the President

Dear students,

Our era is characterized by increasing globalization. Every day, technological advances that allow for the instant transmission of information change the way we communicate, the way we work, the way we learn and the way we live our lives. At the same time, international trade and tourism and worldwide media communication are expanding. Individuals, corporations, markets and nation-states can reach around the world faster and more cheaply than ever before. Traditional boundaries between culture, commerce, technology, politics and the environment are rapidly disappearing. National borders are no longer barriers to learning, living and working. People may speak different languages, eat different foods and worship in different ways, but we do not do so in isolation.

The world today is a global village and we are all members of the same community. Our aim is to provide you with the knowledge, experience and multicultural perspective that will allow you to explore, learn, question, create and thrive as productive members of a global society in your chosen careers. We are dedicated to an interactive teaching style and we maintain high expectations for our students and high academic standards in the classroom. We are committed to giving you the personal attention, support and care necessary for you to succeed and realize your full potential.
